The objective of this exercise is to know how to:

1. create multiple semantic block elements.
2. create multiple lists.
3. use character entities.

Create a web page as follows:

1. Use the header semantic element to contain:
 - a. A heading 1 tag to display Your Name.
 - b. A heading 2 tag to display Your favorite city.
 - c. A heading 2 tag to display your Student ID
 2. Use the main semantic element to contain:
 - a. A heading 3 tag to display a name for the list below. (Choose a good name)
 - b. Create an ordered list with 3 cars that you like.
 - c. A heading 3 tag to display a name for the list below. (Choose a good name)
 - d. Create an unordered list with 3 games that you like.
 - i. Use an inline tag to italicize the second game.
 3. Use the footer semantic element to contain:
 - a. A paragraph tag declaring your copyright of the web page.
 - i. Use a character entity to show the copyright symbol after the year.
 - ii. Use a character entity to show the greek omega symbol before your name.
- Include the **validation script** at the bottom of the page.
 - Run the **validation script** to ensure there are **no errors**.
