Lab Exercise (week3) COMP 1234

o Save the file as exercise03.html
o Upload it to: w3xxxxxx.gblearn.com (where xxxxxx is the last 6 digits of your student ID)
     under:
      public_html/comp1234/lab/exercises/wk03

The objective of this exercise is to know how to:
1. create multiple headers.
2. create inline elements with absolute paths.
3. create links to relative paths.

Create a web page as follows:
1. Create heading 1 to display the Name of your College.
2. Create a heading 2 tag to display your name.
3. Create heading 2 to display your student id.
4. Create heading 3 to display your favourite animal.
5. Draw two horizontal lines. <hr>
6. Create an inline anchor element to "W3schools" (absolute path)
7. Draw a horizontal line.
8. Create a link to your index.html file (root relative path) in the public_html folder.
9. Draw a horizontal line.
10. Create a link (document relative path) to your picture in the asset directory in the public_html folder.
11. Draw a horizontal line.

• Include the **validation script** at the bottom of the page, before the closing body tag.

• **Run** the validation script to ensure there are **no errors**.
